NAME

glossary of concepts

During this school year you will elaborate a glossary with the keywords in Geography. It will help you for the exam, as you will have to define many of the concepts you'll write down and explain in you glossary. This is how you have to do it:

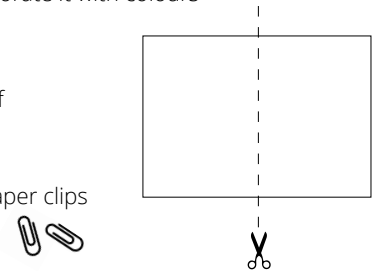

1. Print this document and fold it leaving this page inside and the front cover outside

2. You can paint a picture on the cover or decorate it with colours

3. To make the glossary use blank sheets and cut them in half

4. Hold the sheets you add to the glossary with one or two paper clips

5. Reserve the first three pages to make an index, in which you will write down the concepts. The index must be organized by units.

6. Each unit has its keywords. Write in large the title of each unit as necessary.

You can add drawings or maps to the definitions, but they must be handmade.

This is how it should look like
